Bonsoir,

Veuillez trouver en PJ l'ensemble des bulletins des bilan 24h STEP James Cook. Nous avons effectivement connu des dépassements de la norme de 3 mg P/L en sortie dus à une rupture de stock de FeCl3 de notre fournisseur local et à une surconsommation de FeCl3 pour traiter les problèmes d'odeurs du Centre Ville. Nous avons dorénavant notre propre fournisseur de FeCl3 hors territoire et un stock tampon de cubi d'1m3 de FeCl3 suffisant dans nos locaux.

Les analyses EC et streptocoques vous seront transmises très prochainement.

Vous trouverez en PJ le suivi du débit horaire pour le mois d'août 2013 avec une moyenne à 32 m3/h et un maximum à 88 m3/h.

Objet : Autosurveillance STEP James Cook

Bonjour,

Suite à la transmission des résultats des bilans 24 heures réalisés sur les eaux traitées de la STEP James Cook, je constate que le paramètre « phosphates » est susceptible de présenter un résultat non conforme pour les dates du 9 et 23 juillet 2013 compte tenu des résultats d'analyse du paramètre « phosphore ». Je vous remercie de bien vouloir me préciser les causes de ces dépassements conformément à l'article 7. des prescriptions techniques annexées à l'arrêté d'autorisation.

Par ailleurs, j'attire votre attention sur le fait que les analyses sur les paramètres « coliformes fécaux » et « entérocoques » n'ont pas été fournies ainsi que les volumes d'effluent en sortie de STEP.

Enfin, je vous remercie de justifier que les flux maximums journaliers autorisés à l'article 2.4. n'ont pas été dépassés pour la période de résultats transmis.

Salutations.
